Portfolio: danielbolanos.com

PROFESSIONAL SUMMARY

Cloud Services technician with hands-on experience in technical support and customer service across remote, international environments. Skilled in administering Linux systems, deploying web applications, and using monitoring and ticketing tools. Certified in OCI Foundations and Google Cloud Fundamentals, with personal projects in cloud deployment (OCI) and web development. Fluent in Spanish, English, and Portuguese, with a strong focus on troubleshooting, technical documentation, and user-centered support.

EDUCATION

Escuela Superior de Innovación y Tecnología, San Salvador

Associate Degree in Cloud Services (Técnico Superior Universitario en Servicios en la Nube) — Expected Graduation: February 2026

Instituto Nacional Walter Thilo Deininger, Cojutepeque

High School Diploma (Bachillerato General) — November 2012

EXPERIENCE

Tech Support Assistant (Internship) — *MINSAL* — San Salvador (Remote) — *June 2025 – September 2025*

- Administered Linux systems (Debian 12) in virtualized environments, ensuring secure and stable operation.
- Implemented the LAMP stack (Apache2, MariaDB), BookStack (documentation), and OJS (academic publishing).
- Deployed monitoring tools (Uptime Kuma) and ticketing management (Znuny) to improve incident response.
- Created detailed technical manuals to support onboarding and operational scalability.

Customer Service Agent — *Roomonitor* — Madrid, Spain (Remote) — *July 2024 – October 2024*

- Provided multilingual support (Portuguese, Spanish, English) for guest services and hospitality operations.
- Coordinated issue resolution involving hotel staff and external partners, maintaining high customer satisfaction.

Customer Service Agent — *Foundever* — San Salvador (Remote) — *May 2023 – February 2024*

- Used Salesforce to provide PlayStation account support via chat in Portuguese and English.
- Resolved technical issues (peripherals, console setup, account recovery, billing), achieving +80% satisfaction.

Customer Support Specialist — *Telus Digital* — La Libertad (Remote) — *June 2022 – February 2023*

- Provided support in Portuguese and English for Epic Games via chat and email.
- Handled account recovery, billing disputes, and server/game troubleshooting using Zendesk and Trello.

TECHNICAL PROJECTS

Portfolio Website on Oracle Cloud Infrastructure (OCI) — *Personal project*

- Designed and deployed my personal portfolio website (danielbolanos.com) using a compute instance on OCI, applying knowledge from the OCI Foundations certification.
- Configured virtual networks (VCN), security rules, and SSH access to securely expose the site to the internet.
- Documented the deployment process step by step, reinforcing cloud infrastructure administration practices.

Repository: github.com/JosueDuenas1995

Barbería Alura — Responsive Website — *Practice project (Alura Latam / ONE)*

- Built a barbershop website using HTML5 and CSS3, applying responsive design principles and layout best practices.

- Structured home, products, and contact pages, reinforcing front-end fundamentals applicable to web app documentation and support.
